

## TiNoI-1<sup>TM</sup> Spooled Nitinol

TiNoI-1<sup>TM</sup> spooled NiTi wire comes off the spool **arrow straight** and can be bent to an archform by giving more than required bend.

Sizes .012 and .014 can be left straight and engaged in brackets for initial leveling. .016, .018 and .020 can cause expansion of molars when left straight. This property can be used when **expansion** is actually required.

**Eliminates cutting a piece** from a preformed arch sectional arches and piggybacks

TiNoI-1<sup>TM</sup> spooled NiTi is **Highest quality** of superelastic NiTi.

TiNoI-1<sup>TM</sup> spooled has **Ultra smooth finish** for more aesthetic value and minimum friction

TiNoI-1<sup>TM</sup> spooled NiTi is available On **15 feet spools** in following sizes :

Round: 012", 014", 016", 018", and 020".
